TABLE XV. POPULATION, ENROLLMENT, ATTENDANCE—ALL CHILDREN—1927-1928

This table gives the school population between the ages of 6 and 21 years, the enrollment, the average daily attendance by race for the counties and special charter districts of the State during the school year 1927-1928. The enrollment and average daily attendance figures are separated for the high and elementary schools. A second section gives a series of percentage figures by race for the schools of the State, divided into high and elementary schools.

The Summary gives the various items of school attendance by race for the rural and charter divisions of the State during the years 1927-1928 and 1926-1927.

TABLE XVII. POPULATION, ENROLLMENT, ATTENDANCE BETWEEN AGES 7 AND 13 INCLUSIVE, 1926-1928

This table gives by race the school population, total enrollment and average daily attendance of children between the ages of 7 and 13 years, inclusive, for the State during the school years 1927-1928 and 1926-1927. For children of these ages during these two years there is also a series of percentage calculations; the percentage of school population that is enrolled, the percentage of school population that attends daily, and the percentage of enrollment that is in average daily attendance. For every particular compared the difference between the two years is shown on the third line of each set of figures.

TABLE XXI. TEACHERS, PRINCIPALS AND ADMINISTRATIVE OFFICERS, 1927-1928

This table shows by race and sex the number of teachers, rural and charter, employed in the high and elementary schools of the various counties during 1927-1928. The principals and administrative officers are listed separately, but not according to sex.

The Summary shows the total for the State and compares with 1926-1927. Due to the fact that the principals were not tabulated separately in 1926-1927, the comparison may not be exactly accurate in all details.

TABLE XXIII. AVERAGE ANNUAL SALARIES AND LENGTH OF TERM—1927-1928

This table shows for the rural and charter divisions of the State the average annual salaries paid teachers, white and colored, in the elementary and high schools during 1927-1928. Since this is the first time the average salaries have been figured by counties and since the information had to be obtained from two separate reports, absolute accuracy could hardly be expected in all instances. The average term in days, also given in this table, has been figured from the number of teachers employed and should be fairly dependable.

The Summary gives the total amount paid teachers, the average annual salaries and the average term by race for the years 1927-1928 and 1926-1927.

TABLE XXVIII. TRANSPORTATION, 1927-1928

This table shows by race for the counties of the State: the number of trucks and other vehicles used for transporting children, the number of schools served by trucks, the number of pupils transported, the total daily mileage of all trucks, and the average number of days trucks operated.

The Summary gives in addition the total amount spent for transportation, the average annual cost per pupil transported, and the amount spent in the purchase of trucks for the years 1927-1928 and 1926-1927.

HIGH SCHOOL REPORT—SECTION I

SUMMARY

These reports for the two years, 1926-1927 and 1927-1928, give the usual statistical tables showing enrollment, average daily attendance, length of term, number of graduates, and other pertinent data. The reports include statistics for all classes or types of high schools: white and colored, city and rural, public and private. The report for 1926-1927 is the fourth report of the High School Supervisor that has given statistics for colored schools and for white private high schools.

The reports show a steady increase in enrollment, though the percentage of pupils enrolled in the high schools in the State is still not as high as it should be. The average daily attendance is gratifying, though not satisfactory. The number of high school graduates shows a considerable increase each year. The number of high schools added to the accredited list 1926-1927 shows sustained interest in this matter. This increase in the number of accredited schools was due in large part to the county-wide plan of organization, which made possible the development of a larger type of high school, particularly in the rural districts.

A table is given showing the number of students pursuing each subject taught in high school during the years 1926-1927 and 1927-1928.

HIGH SCHOOL REORGANIZATION

In April, 1926, a bulletin called HIGH SCHOOL REORGANIZATION was published. This bulletin was the result of observation, study, and planning for a period of more than two years. As indicated in the publication (Educational Publicational No. 98, Division of School Inspection No. 24), the purpose of High School Reorganization is two-fold: First, Efficiency; second, Economy.

The reorganization plan was designed mainly for three, four, five, and six-teacher schools. In connection with each of these classes of schools a curriculum is outlined, the organization of the school is suggested, and a daily schedule is made out.

With reference to the curriculum the proposed plan is a real reorganization in the following respects:

1. *Foreign Language*—Only two units of one foreign language, either French or Latin, is provided for in the third and fourth years of three and four-teacher schools. Four years of Latin and two years of French are provided for in Curriculum A of five and six-teacher schools.

2. *Mathematics*—Under the proposed plan Plane Geometry is made an elective subject in the third year in all classes of schools.

3. *Science*—As heretofore, General Science and Biology are put, for the most part, in the first and second years, with Geography—Physical, Commercial, and Industrial—in the third year, Physics in the fourth year, with Chemistry an elective subject in the third year of six-teacher schools.

4. *Home Economics and Agriculture*—For the first time in the history of the State, both Home Economics and Agriculture are provided for in four-teacher schools.

5. *Social Science*—Civics is given in the first year, Modern European History in the second, Ancient and Mediæval in the third, and United States History in the fourth.

6. *English*—The plan is not a reorganization so far as English is concerned, since the subject is required in each year in each curriculum offered in any class of school.

Conferences have been held at various times for discussion of the Reorganization Program with various groups of school people. Schools were organized on this basis to such extent as possible for the session 1926-1927, and also for the session 1927-1928. For a more detailed statement relative to curricula, organization, daily schedules, and the relationship of the high school reorganization plan to the training and certification of high school teachers, reference should be made to the High School Manual soon to be published.

The response on the part of county superintendents, high school principals and teachers, has been most gratifying. A faithful effort has been made to organize schools on the new basis, and the results have been very satisfactory indeed. Most commendable coöperation has been given in this enterprise and the high schools are characterized by an efficiency which commends itself to the favorable consideration of thoughtful school men and women and of all persons interested in the real progress of secondary education in the State.

HIGH SCHOOL REPORT—SECTION II

SUMMARY FOR 1927-1928

There were enrolled in the high schools in the State, 108,065 pupils during this session, 1927-1928. Of this number 56,707 were enrolled in white rural schools and 33,042 were enrolled in white special charter schools, making a total of 89,749 white pupils in public high schools. There were 3,986 white pupils enrolled in private high schools, making a grand total of 93,735 white high school pupils. In this connection it may be noted that fewer pupils were enrolled in white private high schools during the season 1927-1928 than during the session 1926-1927. The enrollment in colored public high schools was 10,942; in private colored schools 3,388, making a total of 14,330 colored high school pupils enrolled. Of the 10,942 pupils in colored public schools, 2,301 were enrolled in rural high schools and 8,641 in special charter schools.

Number of Schools—There were 934 schools in which some high school work was done. Of these 799 were white, 135 colored. Of these schools, 594 white and 64 colored were accredited, making a total of 658 accredited schools. The number of schools with one and two teachers is decreasing every year. A larger type of school is being developed. This is one of the most hopeful tendencies in our high school development.

Number of Teachers—There were 5,026 teachers doing high school work. Of this number 4,484 were whole-time teachers and 542 part-time teachers. Of the total number of teachers employed 4,366 were white and 659 were colored. Of the white high school teachers employed in public schools 1,565 were men and 2,422 were women.

There were 13,850 pupils graduated from high school. Of these graduates 11,278 came from the public white schools and 772 from white private high schools, making a total of 12,050 white high school graduates. There were 1,234 graduates of public colored high schools, and 566 graduates of private colored high schools, making a total of 1,800 colored high school graduates.

There are 28 schools in the Group I, AA class. By this is meant that a school has at least 12 teachers with 310 pupils in an average daily attendance with a length of term of at least nine months. There are 66 Group I, Class A schools, which means that each of these schools has six or more teachers, an average daily attendance of 130 and runs for nine months. Schools of this type are increasing at an encouraging rate which means that more and more boys and girls are being given real educational opportunities. There are 83 high schools in the State which are members of the Association of Colleges and Secondary Schools of the Southern States, which is one of the highest rating agencies in the country.

In connection with the size of high schools it is interesting to note that there are 65 one-teacher schools with an enrollment of 1,454 pupils or 1.62 per cent of the pupils in the high schools. There are 87 two-teacher schools enrolling 3,395 pupils and the one and two-teacher schools have enrolled only 5.40 per cent of high school students. The average number of teachers per high school in the State is 5.20. The average number of pupils per high school is 120. The average number of pupils per teacher is 23.05. In schools with three or more teachers 94.60 of the pupils are enrolled, while 54.54 per cent of pupils are enrolled in schools having six teachers or less. This indicates clearly that a larger type of high school is being developed and this is a most hopeful tendency from the standpoint of economy, efficiency and educational opportunity.

The number of graduates from all high schools, public and private, white and colored, urban and rural, for the session 1927-1928 was 13,850 distributed as follows:

White Public	11,278
White Private	772
Colored Public	1,234
Colored Private	566

The total number of graduates in public high schools was 12,512, in private 1,338.

In studying the number of graduates in white public high schools over a five-year period it is interesting to note the relative number of graduates in urban and rural schools and the relative increase in numbers in each case. The following table indicates that the number of graduates in rural high schools has increased much more rapidly over a five-year period than in urban schools. The number in rural schools has almost doubled since 1923-1924, whereas the urban increase has been 27.4 per cent. The increase for both urban and rural being 61.8 per cent.

The statement of number of graduates by counties reveals a number of interesting contrasts and comparisons. There is wide range in absolute number, running all the way from 15 in Graham County to 480 in Buncombe.

A study of the enrollment by counties will reveal the fact that there is too great elimination from high school. Too many boys and girls start in high school but fail to graduate. There are many reasons for this elimination, such as: Economic necessity, sickness, failure to carry the high school work satisfactorily, indifference on the part of the parents and pupils. However, this situation has improved and the high school is showing holding power now than at any previous period.

K. PERCENT OF TOTAL WHITE PUBLIC SCHOOL ENROLLMENT IN HIGH SCHOOL

Year	Total Enrollment (Grades 1-11)	High School Enrollment (Grades 8-11)	Per cent in High School in N. C.	Per cent in High School in U. S.
1907-08	346,575	7,144	2.1	5.1
1917-18	446,270	23,461	5.3	7.8
1918-19	413,235	23,665	5.7	9.0
1919-20	478,189	29,294	6.1	10.1
1920-21	492,857	33,076	6.7	11.2
1921-22	516,952	39,169	7.6	12.0
1922-23	532,448	58,504	11.0	12.7
1923-24	544,142	58,784	10.8	13.4
1924-25	559,396	67,086	12.0	13.9
1925-26	563,667	73,368	13.0	14.6
1926-27	571,056	81,021	14.2	--------
1927-28	586,697	89,749	15.3	--------

This table shows the increase in enrollment from year to year, giving the percentage of all pupils enrolled in high school. It will be seen that the percentage for the State is approaching that of the Nation, but in a homogeneous State like North Carolina we should have more than the average number of boys and girls in high school.

L. PERCENT OF PUBLIC RURAL AND CITY SCHOOL ENROLLMENTS IN HIGH SCHOOL

Year	Total Rural Enrollment (Grades 1-11)	Total H. S. Enrollment (Grades 8-11)	Per cent Rural Enrollment in H. S.	Total City Enrollment (Grades 1-11)	Total City H. S. Enrollment (Grades 8-11)	Per cent of City Enrollment in H. S.
1917-18	361,696	12,788	3.5	84,574	10,673	12.6
1923-24	410,834	32,415	7.9	133,308	23,369	19.8
1924-25	421,134	37,832	9.0	138,262	29,254	21.2
1925-26	427,242	44,199	10.3	136,425	29,169	21.4
1926-27	425,863	50,260	11.8	145,193	30,761	21.2
1927-28	437,685	56,707	13.0	149,012	33,042	22.2

This table indicates that boys and girls in the rural districts are attending high school in greatly increased numbers, but the cities enroll 22 per cent of their pupils, while the rural districts enroll only 13 per cent.

M. PERCENT HIGH SCHOOL ENROLLMENT IS OF TOTAL ENROLLMENT BY RACE AND CONTROL (Public or Private) FOR THE YEAR 1927-28

1923-24	6,900	13,206	52.8
1924-25	8,248	15,905	51.8
1925-26	9,166	19,597	46.8
1926-27	10,427	22,648	46.0
1927-28	11,278	25,267	44.6

This table shows that almost one-half of the eighth grade enrollment four years ago graduated in 1927-1928, whereas only one-fourth went through high school back in 1918. Here, our position in comparison with the United States average is gratifying. The national average is around 40 per cent, while ours is 44.6.

Average number of teachers per high school, 5.20
Average number of pupils per high school, 120.0
Average number of pupils per teacher, 23.05
94.60 per cent of pupils are enrolled in schools having 3 teachers or more
54.54 per cent of pupils are enrolled in schools having six teachers or less

*NOTE: In this table, teachers having three classes or more a day were counted as whole tirae. Those having fewer classes were dropped. Hence, the difference in the total number of teachers presented below and in Table R.

This table indicates a most wholesome tendency—the elimination of the one and two-teacher high schools and the development of the larger type school. The advantages of the larger high school are too well-known to need argument here.

1927–28	551	43	594	41	23	64	592	66	658

No feature of our educational advancement has been more pronounced or gratifying than the development of accredited high schools. A glance at Table Q will reveal what progress has been made. In 1920, there were only 147 accredited schools, 115 of which were public, while last year, 1927-1928, there was a grand total of 658, of which 594 were for white children and 64 for colored; 592 were public and 66 were private. The 658 schools now on the list together with those to be added this year should make a total of around 700 by the close of the session, 1928-1929.

An accredited high school is one which meets the following minimum requirements. Higher rating is given when better conditions prevail.

1. Four-year course of study.
2. Length of term—eight months, or 160 days, exclusive of holidays.
3. Three whole-time teachers, holding proper certificates.
4. Length of recitation periods—at least forty-five minutes.
5. Sixteen units required for graduation.
6. Laboratory facilities for the teaching of Science.
7. Library of not fewer than 300 volumes.
8. At least forty-five pupils in average daily attendance.
9. Maps according to requirements.
10. An adequate building.
